

Carbon Credit Ratings by Calyx Global

Participate in the carbon market with confidence

The screenshot shows a user interface for a carbon project. At the top, there are navigation tabs: Search, Insights, Safeguards, Where to Buy, and Retirement Insights. On the right, there are links for 'Following (9)' and 'My Profile'. The main content area features a 'Carbon Project' card for 'Project A'. The card includes a 'Status registered' indicator, location 'Meru, Nanyuki, Kenya', and an 'On watch' status. A description states: 'This is a reforestation project that aims to support smallholders restore agricultural lands. It combines plantations for timber with agroforestry. Prior to the project activities the land-use was degraded land, pasture, and annual crops such as cocoa and coffee'. Below the description, 'Claimed SDGs' are listed with icons for 1 (No Poverty), 3 (Good Health and Well-being), 6 (Clean Water and Sanitation), 8 (Decent Work and Economic Growth), 9 (Industry, Innovation and Infrastructure), 10 (Reduced Inequalities), 11 (Sustainable Cities and Communities), and 12 (Responsible Consumption and Production). To the right of the project card, there are two rating cards: 'GHG rating' with a 'B+' score and 'SDG rating' with a '+4' score and 'Medium-High impact'. Below these is a scatter plot comparing 'High SDG' vs 'High GHG' ratings, with a 'Top 50%' and 'Top 25%' highlighted.

Second Nature and Calyx Global have teamed up to help you identify quality carbon credits. Carbon credits can help you achieve your climate goals, but how do you manage the risk? Calyx Global's independent, unbiased analysis and carbon credit ratings will help you derisk your decisions for your stakeholders, your company and the planet.

Calyx Global's alignment to the Core Carbon Principles of the ICVCM means that their analysis meets the industry's highest standards for quality. With more carbon credit ratings than any other agency, and GHG integrity ratings and Sustainable Development Goal (SDG) contribution ratings spanning various project types, from nature-based to technology-driven solutions, you can discover carbon credits that drive real impact.

Your Second Nature membership gives you access to Calyx Global's extensive carbon credit ratings coverage. If you want to dive deeper into analyst research on GHG, SDGs, or ESR for a particular carbon project, please contact Second Nature or Calyx Global directly for research reports.

What is included

- Access to all greenhouse gas (GHG) integrity risk ratings across over 600 projects
- Sustainable Development Goal (SDG) ratings that indicate the quality of evidence and level of impact for over 350 projects
- Receive insider insights and research on carbon market news and trends

How the partnership works

- As a member of Second Nature, you are automatically eligible for free access to an Essentials level subscription to the Calyx Global Platform
- Reach out to mleigh@secondnature.org to activate your subscription
- You'll receive login credentials to sign up and access the platform
